

It's Here!
**Superfast
broadband
has arrived
in your area**

- ➔ **Choose from a wide range of superfast broadband packages.**
Some even come with sport or film so that you can watch the latest content on your computer or TV.
- ➔ **Select from a range of different Internet Service Providers.**
The CSW Broadband project ensures that you are not limited in your choice of suppliers.

What do you need to do?

1. To check that your line is ready to go superfast visit www.dslchecker.bt.com
2. Sign up with an Internet Service Provider for superfast services. Remember to check different providers for the best rates that meet your needs. For more information check out an independent reviewer such as www.moneysavingexpert.com

Please note: In some circumstances unexpected issues may arise that could affect the rollout of fibre in your area, even if the fibre cabinet has been built. When fibre becomes available, there is no guarantee that you will be able to achieve superfast speeds at your property, due to the distance from the cabinet and/or the quality of your copper connection.
